

Data analyst with hands-on experience in SQL, Excel, and Power BI, applying exploratory analysis and data visualization to uncover business insights across sales, retail, and financial datasets. Bachelor's degree in Game Technology from STMM MMTc Yogyakarta, bringing a self-taught, project-driven approach to data analysis backed by independent portfolio work and structured training. Skilled at translating raw data into clear, actionable findings for decision-making.

EDUCATION

STMM MMTc – Yogyakarta Bachelor in Game Technology (S. Tr. Kom.) - GPA: 3.56 / 4.00 - Active member of the Student Association, serving as Staff Member for the 2024 GTX event, contributing to event planning and coordination. - Selected participant of the Dise Young Leaders Japan 2023 program; ranked among the top 30 participants out of 300.	2021-2025
--	-----------

SKILLS

Hard Skills SQL (PostgreSQL) Microsoft Office (Word, Excel, Power Query, Power Pivot) Exploratory Data Analysis (EDA) Data Visualization (Tableau, Power BI)	Soft Skills Analytical Thinking Team Collaboration Problem Solving Technical Documentation
---	---

PROJECT EXPERIENCE

Superstore Sales Analysis – Personal Project - Analyzed 9,800 retail transactions spanning 4 years using Pivot Tables to identify sales patterns by state, segment, category, and shipping mode - Uncovered \$827K in Technology revenue despite lowest order volume, revealing a consistent gap between order count and revenue across product categories - Identified Home Office as an underleveraged segment, averaging \$243 per order vs. \$225 for Consumer, and recommended targeted retention strategy	2026
Chinook Digital Media Store Analysis – Personal Project - Wrote multi-table SQL queries, including CTEs and window functions (RANK() OVER PARTITION BY), across an 11-table relational database to analyze sales trends - Determined Rock as the top genre in 92% of 25 countries analyzed, informing genre-based content recommendations - Quantified format preference by identifying MPEG audio as the leading file type, outselling the next format by 13x (1,976 vs. 146 sales)	2026
AdventureWorks International Sales Performance Analysis – Personal Project - Explored 4 years of international sales data using Excel Pivot Tables, then rebuilt the analysis in Power BI with data modeling and DAX measures - Identified the U.S. as the top-performing market at ~\$32M in sales, guiding focus toward high-revenue regions - Built an interactive dashboard with slicers and drill-down functionality, enabling stakeholders to explore performance by country and time period	2026
Major Companies Financial Analysis – Personal Project - Analyzed longitudinal financial data (2009–2022) across multiple industries to evaluate revenue trends, profitability margins, and the economic impact of COVID-19. - Conducted exploratory data analysis and data cleaning using Excel Pivot Tables to compare net and gross profit margins across sectors. - Engineered an interactive Tableau dashboard to visualize complex financial metrics, highlighting the IT sector's 7x revenue growth and identifying resilient operational models.	2026
Hackathon Participant – Fresh Graduate Academy - Collaborated with a 5-person multidisciplinary team of Machine Learning, Deep Learning, and Data Analysis specialists to solve a data-focused challenge under time constraints - Analyzed datasets and interpreted findings to inform a practical, solution-oriented concept from problem definition through prototyping - Translated cross-functional input into data-driven insights, strengthening rapid analysis skills under real-world time pressure	2025
Lead UI/UX Designer – Fresh Graduate Academy - Led UI/UX design for an E-government / citizen services-themed application, prioritizing usability and intuitive user flows. - Produced comprehensive design artifacts, including affinity maps, POV statements, How-Might-We frameworks, design systems, and low- to high-fidelity prototypes. - Completed the project within 1 month as part of a 3-person team, with designs receiving positive user feedback.	2023

TRAINING

Junior Game Programming – Digitalent Scholarship Kominfo (May 2022) Industry Training and VSGA Alumni Apprenticeship Preparation – Digitalent Scholarship Kominfo (December 2022) Game Development dan Animasi – Digitalent Scholarship Kominfo (August 2023) UI UX Designer – Digitalent Scholarship Kominfo (January 2024) Mobile App Development with React Native – Digitalent Scholarship Kominfo (March 2024) Data Analytics Full Learning Path – Digitalent Scholarship Kominfo (November 2025)
